REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is: Wachendorfer (USP 5,950,547) which discloses a device comprising a hydrocarbon gas supply, a second hydrocarbon supply and a hydrocarbon injector capable for dispersing a second hydrocarbon from said second hydrocarbon supply into said hydrocarbon gas, and an acceleration / gasification tube comprising a heat source heating said acceleration tube. The reference does not disclose a first end of said acceleration tube being connected to a discharge end of a first expansion nozzle, wherein an intake end of said first expansion nozzle is connected to said injector, and a second end of said acceleration tube being connected to a second expansion nozzle which is part of a diffuser, wherein said diffuser is connected to gas evacuating means to maintain a constant flow through said acceleration / gasification tube and said diffuser. Therefore the instant claim combination, reciting a first end of said acceleration tube being connected to a discharge end of a first expansion nozzle, wherein an intake end of said first expansion nozzle is connected to said injector, and a second end of said acceleration tube being connected to a second expansion nozzle which is part of a diffuser, wherein said diffuser is connected to gas evacuating means to maintain a constant flow through said acceleration / gasification tube and said diffuser, is allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
